## **Subject: Spontaneous Application for Engine Research and Development Opportunities**

Dear Hiring Team,

I am writing to express my strong interest in professional opportunities within the Engine Research and Development area, a sector for which I have a deep passion and where I am dedicated to building my career.

I obtained my Diploma as a Mechanical Expert in Mechatronics and Energy in 2023, and I am currently consolidating my technical foundation by attending the Politecnico di Torino. My primary goal is to make a concrete and valuable contribution to innovation in the motor industry.

Throughout my academic journey, I have developed a strong specific interest in the research, development, and testing of advanced solutions for engine lubrication and efficiency.

I believe that my technical background, combined with my natural aptitude for teamwork and solving complex problems, forms a solid basis for enthusiastically contributing to innovative projects. I am a determined, precise, and continuously growth-oriented person.

Please find my curriculum vitae attached (or readily available on this website), which contains further details regarding my educational and professional background.

Thank you for your time and consideration. I remain fully available for an introductory discussion to better illustrate how my skills and ambition align with your needs.

Sincerely,

Vincenzo Misuraca
